Notice to Our Valued Customers of an Opportunity to Comment on the Filed 2/4 Year Energy Optimization Plan

Dear valued customer,

The State of Michigan "Clean, Renewable, and Efficient Energy Act" of 2008 (Public Act 295) requires electric utilities in Michigan to develop and implement plans to:

 Reduce consumption of electricity by instituting energy optimization measures such as providing incentives to customers to use more energy efficient equipment and devices and instituting other energy conservation measures.

In accordance with Public Act 295, the Public Lighting Department (PLD), a municipal electric utility, is required to file a 2/4 year plan report with the Michigan Public Service Commission (MPSC) to provide information related to the Energy Optimization Plan (EOP), and submit a summary of the plan to PLD customers.

The department has developed a proposed 2/4 year EOP for the period of (January 2012 – December 2015), which will be filed with the MPSC on September 1, 2011 in compliance with mandated requirements as Case No.U-16697. The Department will also make these Plans available on its website at: http://www.detroitmi.gov/Departments/PublicLighting/tabid/143/Default.aspx.

Our customers and the public are invited to submit comments on the plans. Written comments on the proposed EOP may be submitted to: Mukesh Patel, General Manager, Public Lighting Department, 9449 Grinnell Avenue, Detroit, MI 48213. Comments submitted to the Department must be received no later than August 15, 2011. All written comments received by the Department will be compiled and filed with the MPSC by September 1, 2011.

Mukesh Patel, General Manager Public Lighting Department
